

Coronavirus Social Story

Coronavirus is an virus that makes people sick.

Coronavirus can spread if a person who has it comes in contact with another person.

Coronavirus has made a lot of people sick.

Because a lot of people are sick, events, trips, and activities are being cancelled.

If something I was planning on going to is cancelled my parents or teacher will tell me.

I may be sad that I cannot go to the event.

I can choose something else fun to do instead.

It is important to stay healthy.

I can try to stay healthy by:

- Washing my hands for 20 seconds with warm water and soap.

- Using hand sanitizer.

- Covering my mouth and nose if I sneeze or cough.

- Trying not to touch my face or put my hands in my mouth.

I might also see people wearing masks or gloves.

If I have questions about Coronavirus I can ask my parents, my doctor, or my teacher.
